

WAGNER AMARAL

FULL STACK DEV

ABOUT ME

Behold, for I am a software developer and DnD enthusiast, wielding both a keyboard and a 20-sided die with equal skill. My passion for coding is matched only by my love for adventuring in imaginary realms, where I slay dragons and unravel complex plotlines with my trusty group of fellow adventurers.

But make no mistake, when it comes to coding, I am just as dedicated and passionate, pouring countless hours into crafting elegant and efficient solutions to complex problems. So whether it's battling goblins or debugging code, I am always up for a challenge and eager to tackle whatever comes my way.

EXPERIENCE

- **2013 - present**
SEDEC | State Secretariat for Economic Development
Full stack dev
 - Created the first system to control the Constitutional Fund of the Midwest that became a reference and example for the Federal Government, which later took over the project to make it available throughout Brazil through SUDECO. **Technologies:** Java, JasperReports, Spring Boot 2 (Security, Data, MVC), React 16, PostgreSQL and Docker;
 - Created the site "investmt" to attract investors to Mato Grosso state. **Technologies:** VueJS 2 and Docker;
